DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 18, 23, 24, 26-28 are rejected under 35 U.S.C. 102(b) as being anticipated by Goldsmith et al (5,228,852). Goldsmith teaches a method of treating a body structure comprising the steps of optically connecting a filament 17 to a light source (laser, not shown), wherein the filament is a fiber transparent to the light beam delivered by the light source, pulling a portion of the filament from the container 10 (see abstract), and placing the pulled out portion of the filament near the body structure. It would be inherent that the light source is turned on at some point.

Allowable Subject Matter

Claims 1-17 are allowed.

Claims 19-22, 25, 29-31 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
